

Retinal Exam

MEMBER *VISION SOURCE* NETWORK

Patient name \_\_\_\_\_

At **Abundo Eye Care**, we pride ourselves on providing our patients with the best possible standard of care. Because of this, we now offer the Optomap retinal exam. This *non-invasive* imaging test allows Dr. Abundo to see a much more detailed view of the retina than with traditional methods. The image becomes a permanent part of your medical file, allowing Dr. Abundo to make important comparisons year over year. In many cases, there will not be a need to dilate after this process. If Dr. Abundo decides that there is a need for dilation, this will be discussed during your exam.

These images will help see early signs of many retinal diseases and systemic conditions such as ***glaucoma, age related macular degeneration, high blood pressure, diabetes, retinal holes or detachments and retinal tumors***

The discounted \$35 co-pay for this procedure is generally a non-covered service unless being used to actively follow ocular disease. Any questions you have about the optomap® Retinal Exam can be directed to your doctor during your examination. Dr. Abundo strongly believes that either traditional dilation OR the optomap® Retinal Exam is an essential part of your comprehensive eye exam and prescribes it for all patients once per year.

YES: I understand the importance of having the OPTOMAP Retinal Exam and would like to have it performed (\$35 copay)

NOT SURE: I understand that Dr. Abundo would like for me to have these images taken, but I would like to discuss this with him/her first.

NO: I elect to have my eyes dilated (no additional charge). I understand that it will cause light sensitivity and may blur my vision for about 3-6 hours

I decline both dilation and OPTOMAP and understand that a comprehensive examination has not been performed.
